

Remove App Passwords (iPhone)

Problem:

“Unable to verify account information” when trying to set up your Outlook account using the native iPhone app.

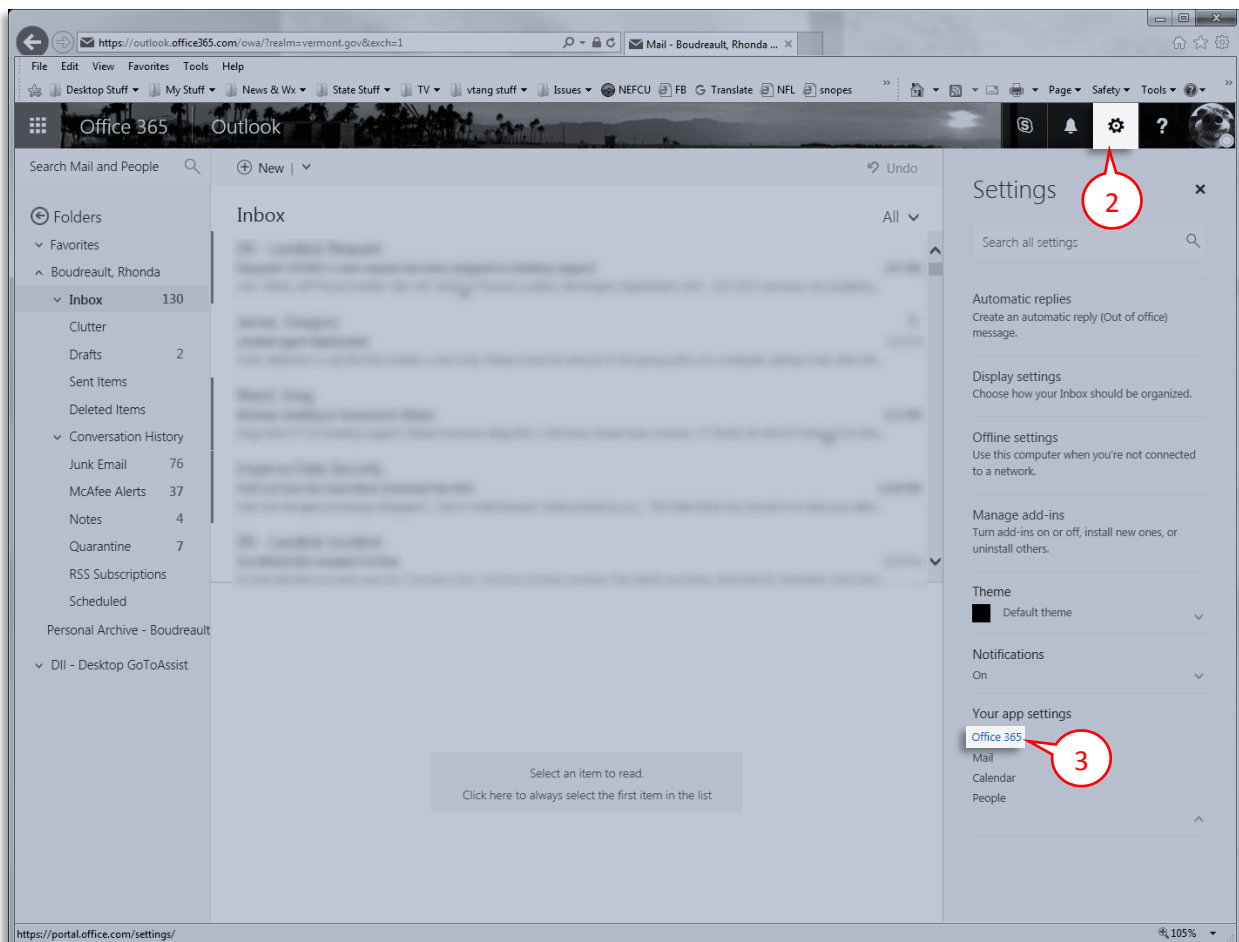

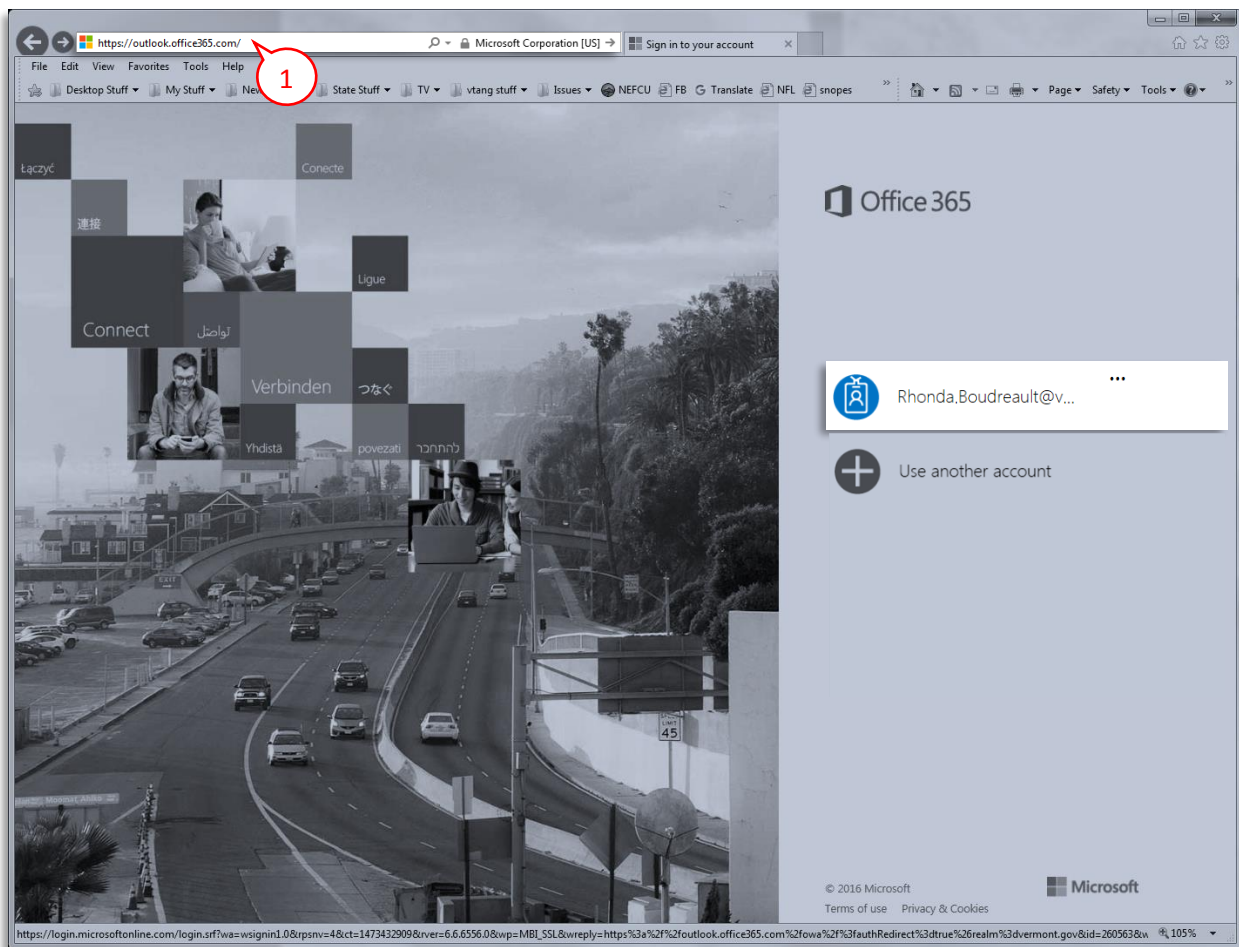

Resolution:

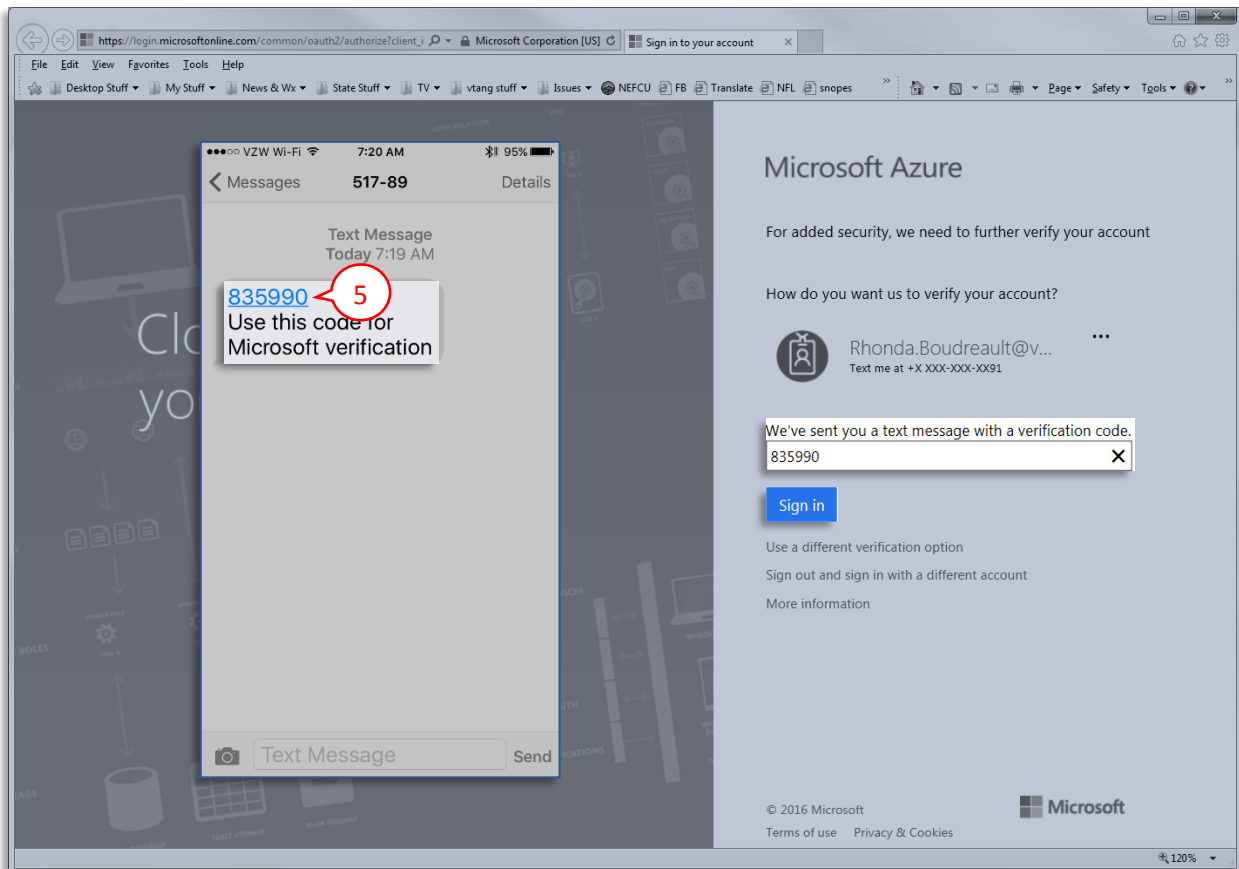

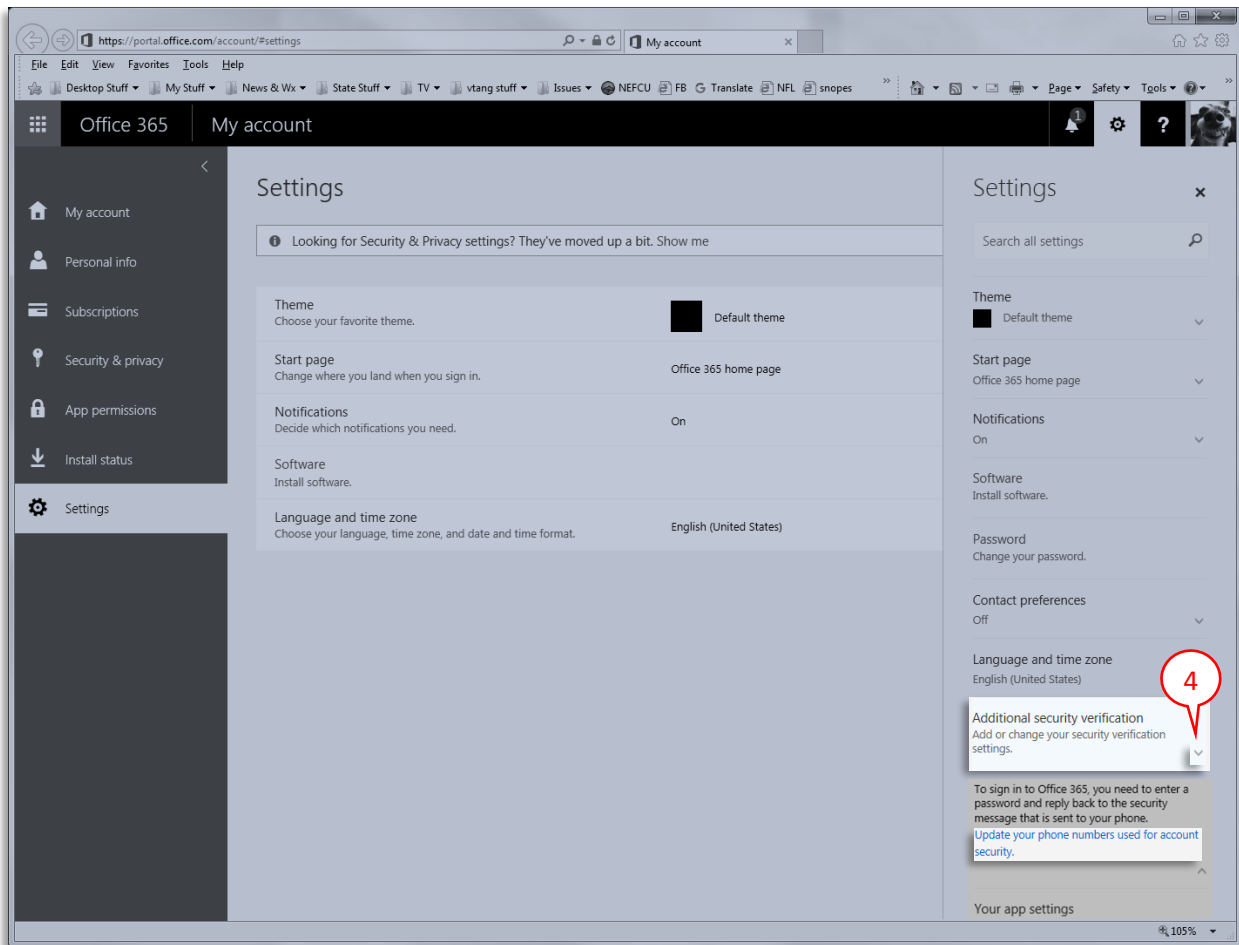

On your computer:

1. Log into your Office 365 account at <https://outlook.office365.com/owa/>
2. Click on the gear icon
3. Click the Office 365 link
4. Expand the “Additional security verification” section and click on the link for “Update your phone numbers used for account security”
5. If you have chosen “text” as the preferred method of verification, check your iPhone for the verification code and enter it into the box then click “Sign In”
6. Click the “app passwords” link, click “delete” to delete passwords (it is recommended that you delete all passwords saved here), “yes” to “Delete app password?”, “close” to “App password successfully deleted”
7. Click “Create” to create a new password. Enter a hint, Next.
8. Your new password has been created. Click “copy password to clipboard”. Note: Do not close out of this window until you have finished setting up your account as you will need to enter this password twice.

On your iPhone:

9. Settings > Mail, Contacts, Calendars > Add Account > Exchange
10. Enter your “email address” and the **new password** from step 8, Next
11. Server is **outlook.office365.com**, enter the **new password** again, Next
12. All blue check marks indicate the account has been setup successfully
13. Save

Office 365

Additional security verification app passwords

To sign into Outlook, Lync or other apps installed on your computer or smart phone, you'll need to create an app password. When prompted by the app, enter the app password instead of your work or school account password.

You can use the same app password with multiple apps or create a new app password for each app. How do I get my apps working with app passwords?

Note: If you are an admin of a Microsoft service, we recommend not using app passwords.
